WINES

CORAVIN

Coravin was developed to provide the ultimate system of wine preservation. It allows access to the wine in the bottle without having to remove the cork. Wine is removed via a Patented needle that penetrates the cork without causing any damage to the cork and the wine is displaced by inert Argon gas. This keeps the oxygen at bay and keeps the wine in the condition it was prior to the first wine removal. This gives us the opportunity to feature tastings portions of outstanding individual bottles without removing the cork.

Our Coravin Program will feature a wide range of outstanding wines. The offering will change frequently giving you the opportunity to taste wines in portion sizes (50 mls) at approachable prices.
